A team of scientists specialising in all kinds of disciplines is sent into outer space. Their mission: to find a planet that is habitable for human beings. During the mission, the team comes across an unknown planet. There is intelligent life there, inhabitants who call the planet 'Mundus'. The scientists explore the planet. What about gravity here, and the seasons? Is the local wildlife dangerous? What is the language of the inhabitants like? And what do those yellow triangles mean?

Do your own research with Expedition Mundus.
